World Compliances Inc.

Your entrusted partner for exportation and global certification

World Compliances Inc. is a technology compliance consulting company that specializes in assisting manufacturers, importers, distributors, and retailers around the world to comply with current regulations in all countries around the world. All countries in the world have their own regulations: some are more mature than others, some cases require laboratory testing, while others require a simple statement to obtain product certification. We have created an extensive local agency network that allows us to provide the quickest and most cost-effective alternatives to comply with such diversified regulations.

Global compliance with local services

World Compliances Inc. has its own offices in North America, Europe and Asia, so you can work with local experts to help you get the certification and approvals needed to sell products in your target market, providing seamless support across time zones.

Overall solution

Whether you are interested in one country or multiple markets globally, we will use an integrated and customized service approach to meet all your product compliance needs. World Compliances Inc. global service package provides a complete compliance solution that covers the entire process and many regulations such as safety, electromagnetic compatibility (EMC), radio/wireless and energy efficiency.

Accelerate product launch

By working with us, you can also use the optimized service path of a global certification program (such as the CB program) and work closely with other organizations around the world. This usually means that you can get certification or approval in many countries without having to retest or work with multiple organizations. Ultimately, this means faster time-to-market and lower costs.

Certification Service Catalogue:

- Safety
- Hazloc
- Wireless
- Telecom
- Energy Efficiency
- EMC
- Medical Device
- Factory Inspection

Certification Standard Scope:

Safety:

IEC 62368	Standard for ITE and AV
